

Hi, this is Traci with enJoy Movies Your Way. In this tutorial, I will show you how to start the enJoy program.

Before starting enJoy, insert a DVD into the DVD drive on your computer. When you do this, a program will probably start up to play your movie. Click Stop and close that program. Then open enJoy. If you're running Vista, you will see a warning message – just click Allow.

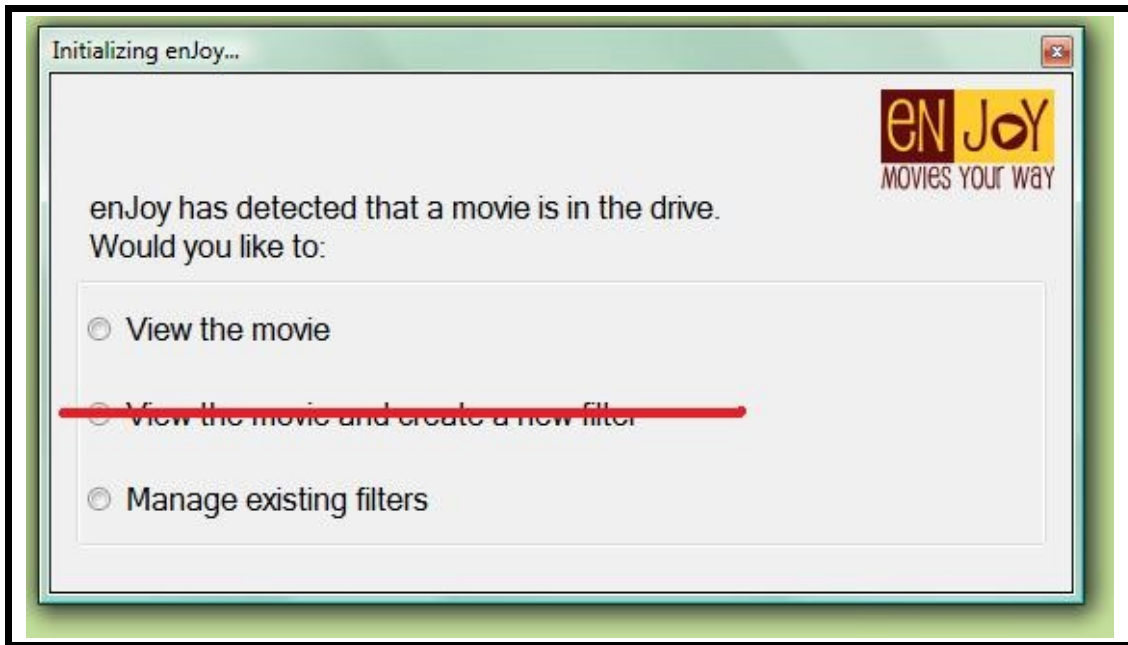

The first time you open enJoy, you will be prompted to enter your user name and password. This is the same user name and password that you registered on the enJoy Movies Your Way website. You won't need to enter this information again unless you change your password on the website.

enJoy offers you the opportunity to backup your filters to our online environment. It's a good idea to choose Yes.

The first time you use enJoy, don't select the first option to View a Movie. That's for viewing a movie after a filter has been created. For now, just click on the third option to Manage Existing Filters.

The first time you use enJoy, you need to create Profiles for each family member. Please view the next tutorial to see how to create Profiles. That's it. In this tutorial, we have seen how to start the enJoy program.
