

Hi, this is Traci with enJoy Movies Your Way. This tutorial will show you how to create Profiles.

When you open enJoy for the first time, the first thing you should do is set up a Profile for each member of your family.

But before creating Profiles, it is important that you have a basic understanding of the Scene Intensity Rating Scale, or SIR Scale. To learn about the SIR Scale, visit the enJoy Movies Your Way website. The Scene Intensity Rating Scale is a guideline for rating individual scenes. Scenes are assigned a Category, such as Violence or Language, and an Intensity Level from 1-5. You'll need to decide what the acceptable intensity levels are for your family members.

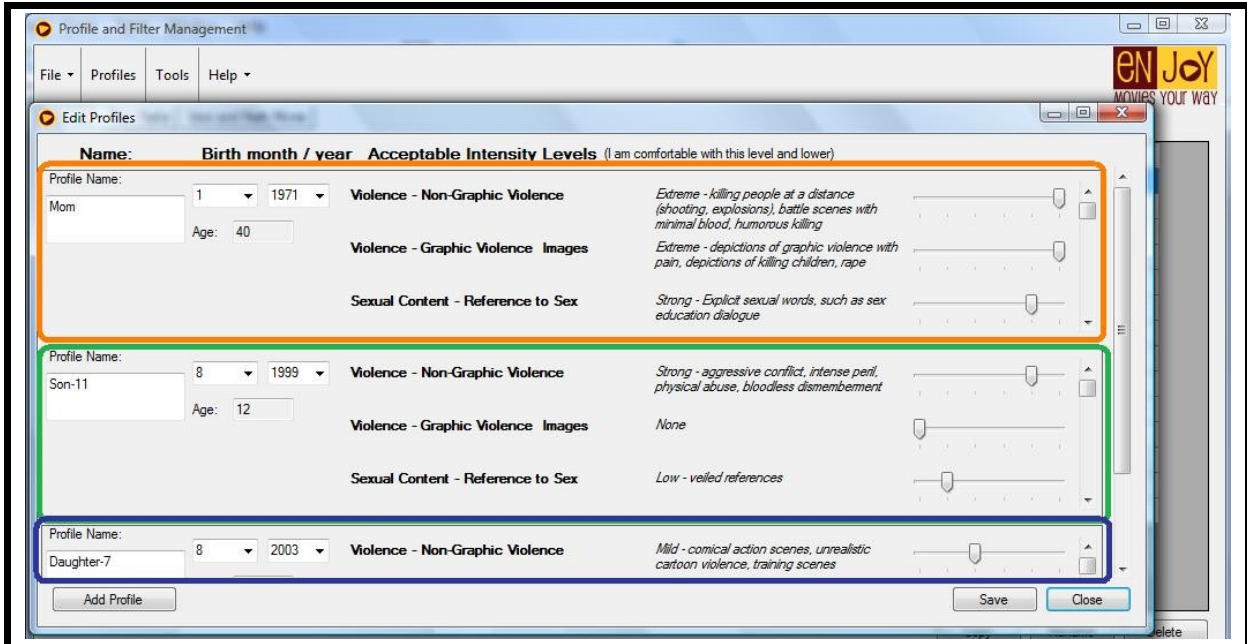

Now, let's create Profiles. First, maximize the screen, then click on Profiles.

Click on Add Profile. Enter the family member's name and birth month and year. This will tell enJoy how old the person is, which will determine what the initial defaults are for the Acceptable Intensity Levels. You can adjust the Intensity level for each category as needed. It starts from 0, meaning that nothing is acceptable in that category, or 1 (for low), 2 (for mild), all the way up to 5 (which is extreme).

Repeat the process for each family member.

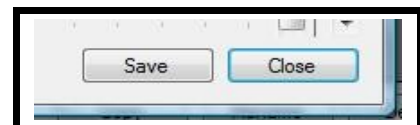

Each of these profiles have different default settings under the categories. [Note: the SIR Scale will explain more about this. For example, a 13 year-old will default to a 4 for Non-Graphic Violence, while a 6 year-old will default to a 2.]
