1. Select Enjoy Player.
2. Click Uninstall.
3. When it is finished, close Control Panel.

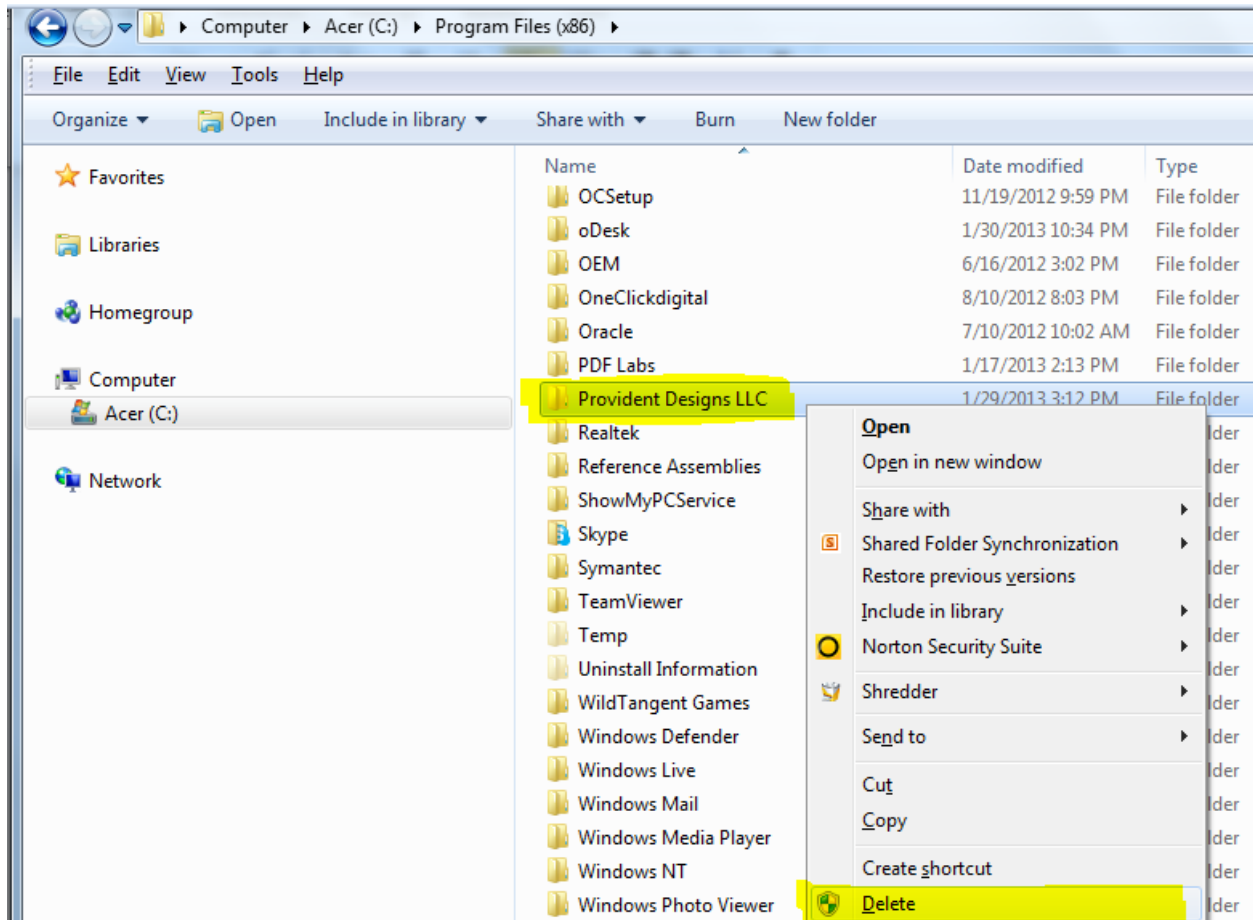

Even though enjoy has been uninstalled, it left some back-up files in the program folder. You should remove this folder from your computer.

1. Right-click on the Start button and you will see a popup menu.
2. Choose “Explore” or “Open Windows Explorer” – click on it with your left mouse button.

1. Double-click on your hard-drive (C:).
2. Double-click on Program Files (x86).
3. As you keep double-clicking, you will see the path above.

Find the folder called Provident Designs LLC. Right-click on it and you will see a popup menu. Left click on Delete. This will permanently remove enjoy from your computer.

Note: If you are deleting enjoy version 1.5 or later, then you will want to delete these two folders:

- C:\Program Files (x86)\enJoy ← These are left-over program files
- C:\Users**Your User Name**\AppData\Roaming\enJoy ← This is where the filters are stored.
