

enJoy Installation Instructions

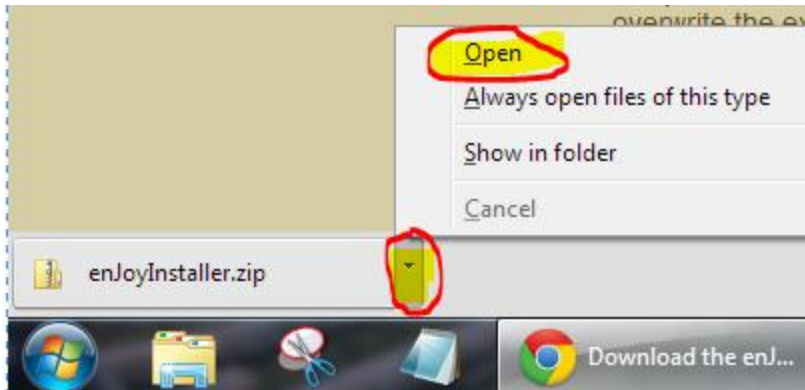

1. Open your browser and navigate to www.enjoymoviesyourway.com.
2. Click on Sign Up.
3. Click on Download enjoy.
4. Click on the link to download enjoy.
5. Where you file is saved depends on how your computer is set up. Some browsers are set up to save all of your files to your Downloads folder without asking you where you want to save it. Other browsers are set up to ask you where you want to save your file. It doesn't matter where you save it, but once it is saved, you want to open/run it. Double-click on that file to open it.

You might see a warning message such as this one from Chrome:

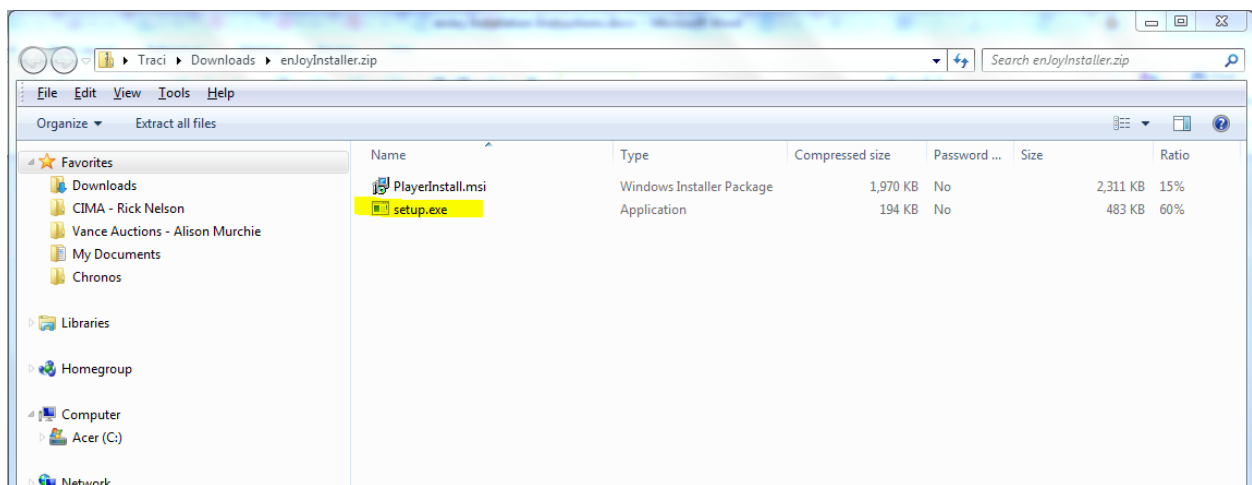

It is just saying that enjoy is not a program used by very many people, so they are not sure whether you should trust it or not. enJoy does not have any viruses or spyware. You can click the black arrow to get a menu, then click on Keep.

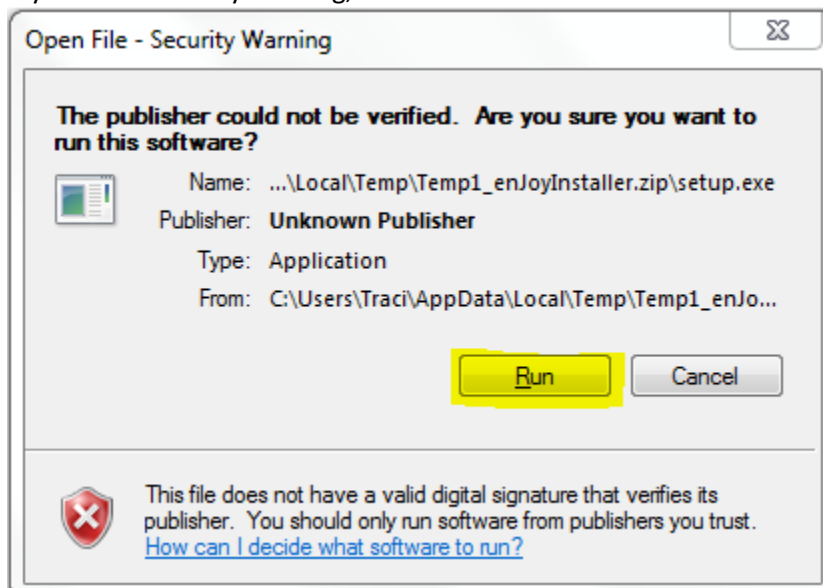

After you click Keep, you will see something like this:

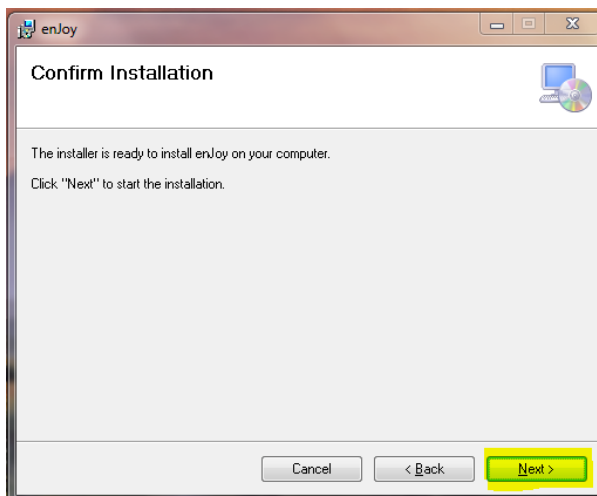

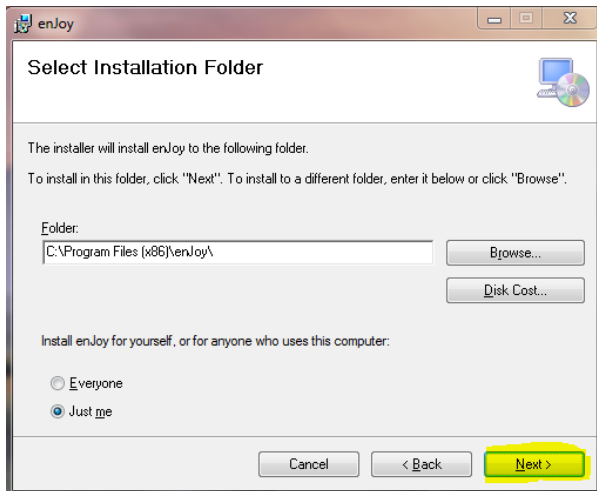

Click on the black arrow to get a menu, then click Open, which will open the folder containing the program. Double-click on setup.exe to install enjoy.

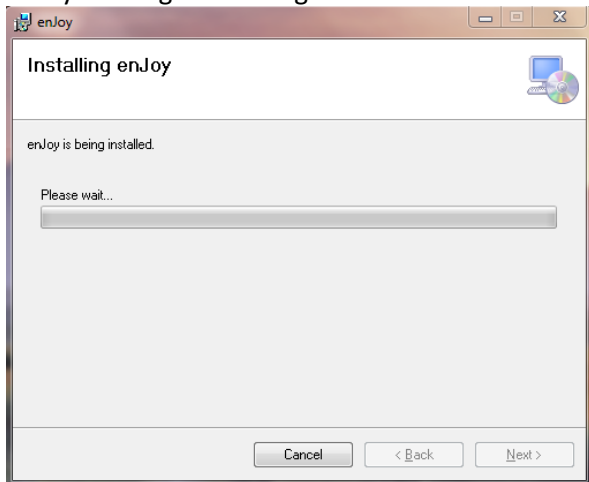

If you see a security warning, click Run.

Then just keep clicking Next through the rest of the installation screens:

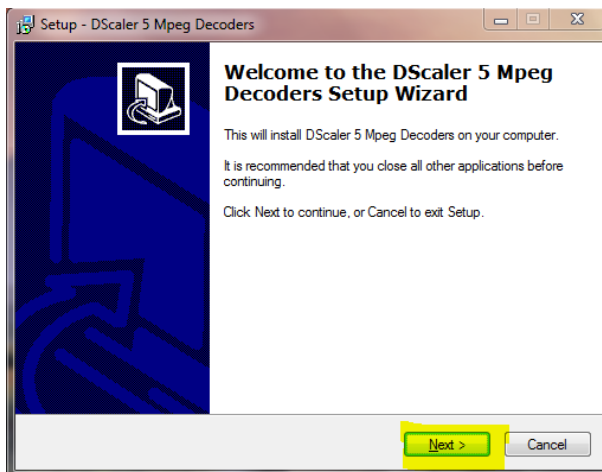

enJoy will begin installing.

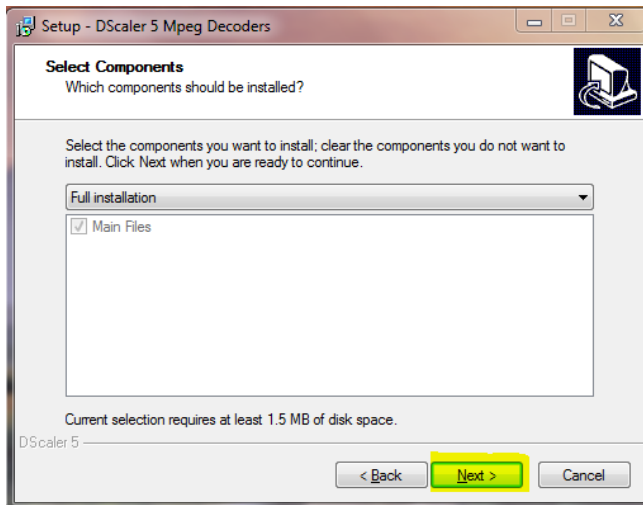

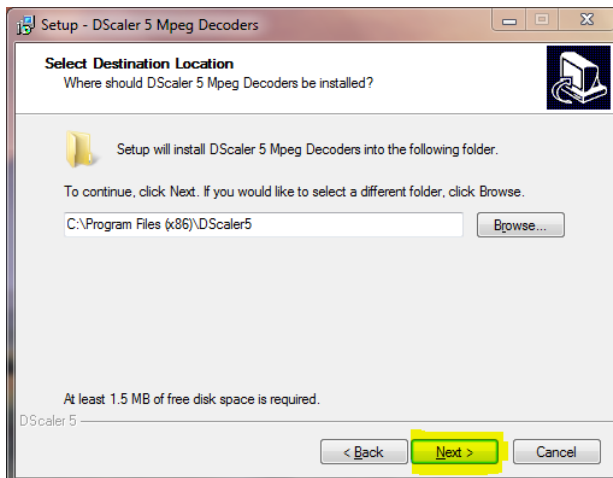

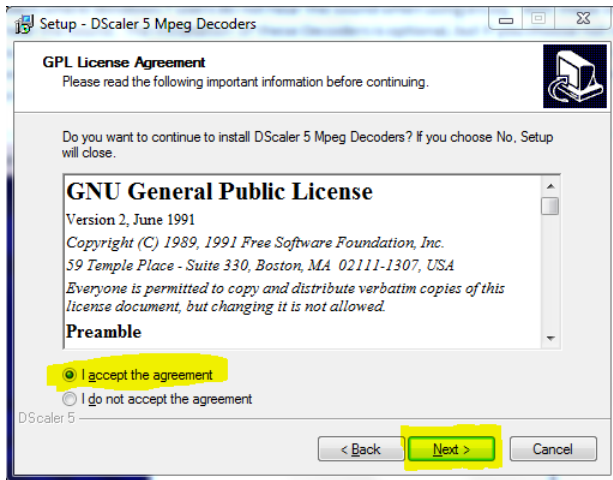

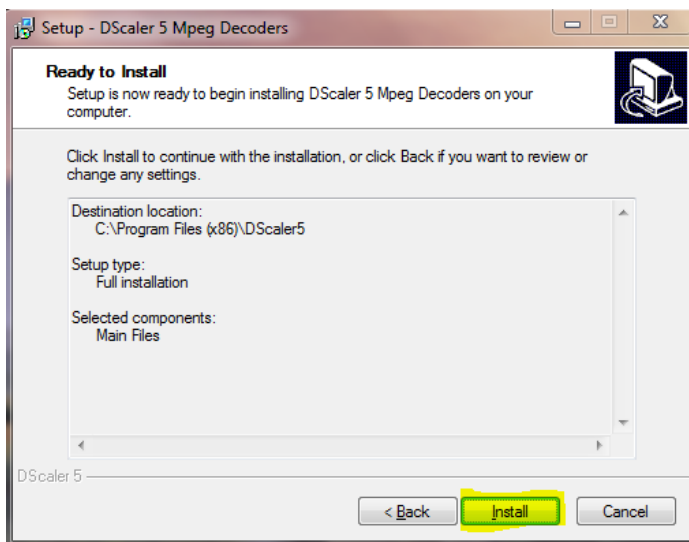

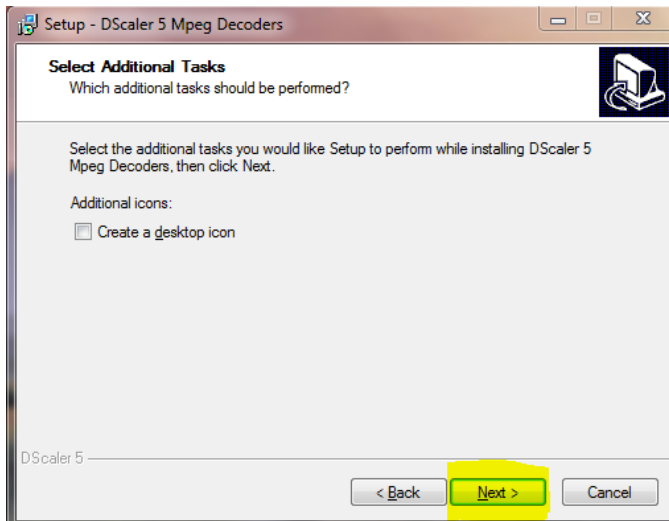

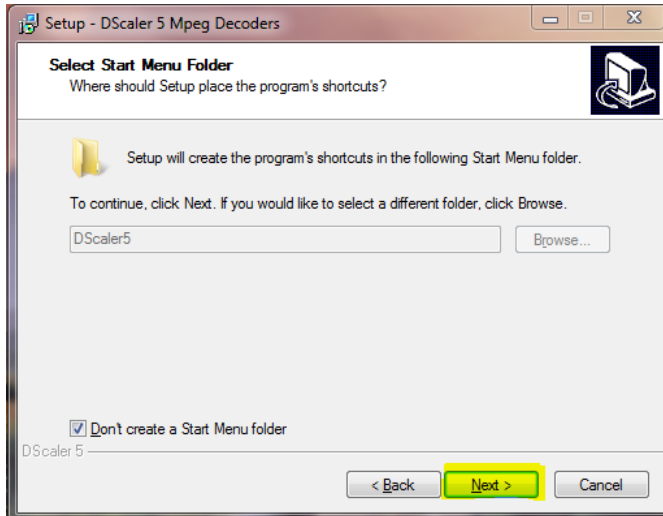

You might see another security message asking you to confirm that you want to install enJoy. Click Yes/Confirm.

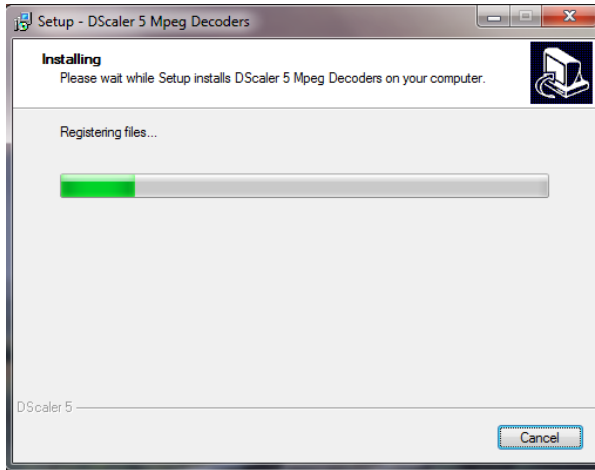

After enJoy finishes installing, Windows 7 users will see a screen for DScaler 5 Mpeg Decoders. This is to fix a problem where Windows 7 users do not hear the sound when using enJoy. With these Decoders, you will hear the sound. The installation of these Decoders is optional, but if you choose not to install them, you will need to search the Internet to find other Decoders (CODECs) that will work for you. No users have reported any problems installing this particular CODEC, so we have included it here for your convenience.

Just keep clicking Next through the rest of the installation screens:

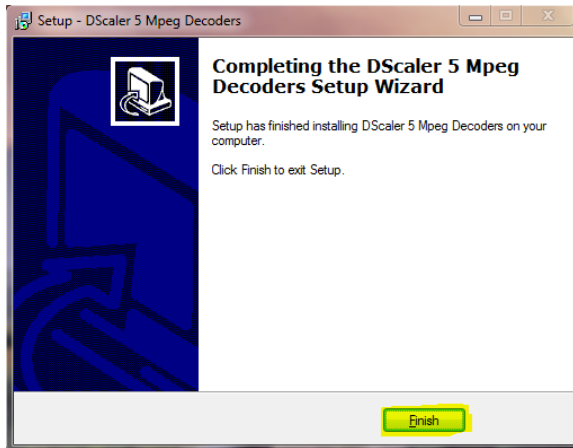

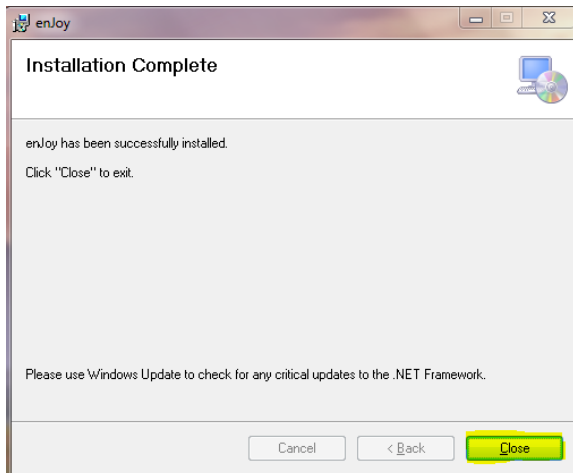

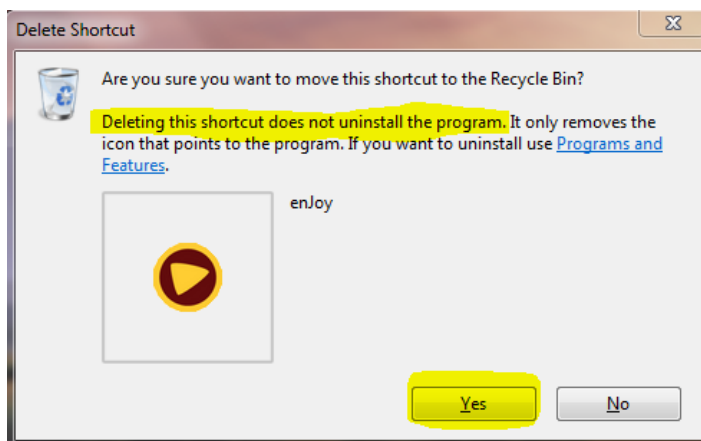

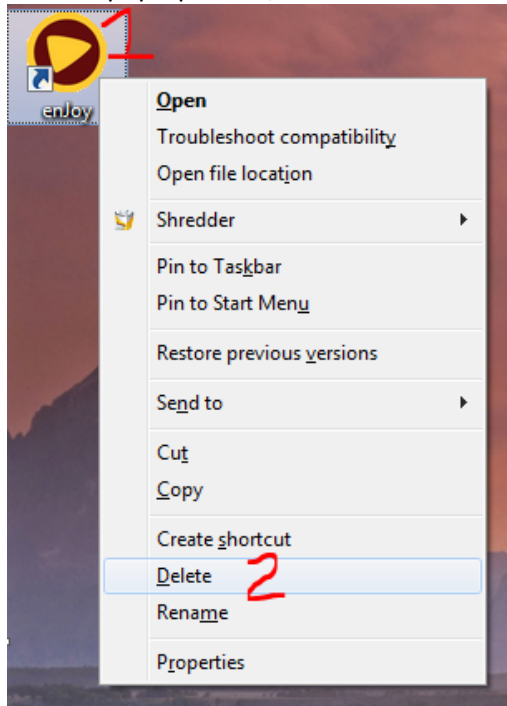

Click Finish.

Click Close.

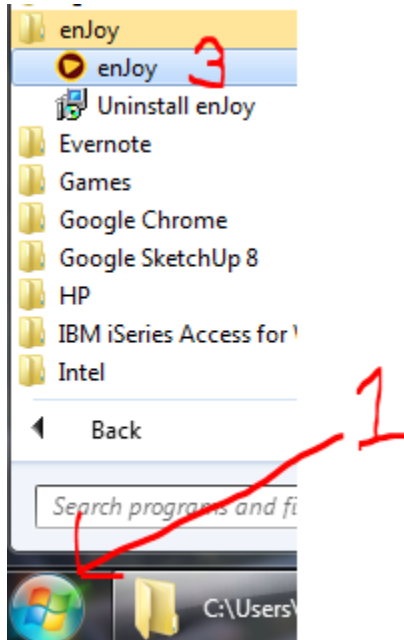

enJoy places a shortcut on your desktop, which you can delete if you don't want it cluttering up your desktop. Deleting the shortcut will not delete the program itself. To delete the shortcut, right-click on it to see a pop-up menu, then left-click on Delete.

To run enJoy,

1. Click on Start
2. Click on All Programs
3. Click on enJoy (scroll down if necessary to find it)

It is generally better to insert a DVD first before running enJoy. When you insert a DVD into your computer, often another program will attempt to play the movie for you. Cancel out of that program, then open enJoy.
